

GABRIEL ADEWUNMI

AI Product Manager | Generative AI | Growth, B2C & SaaS Products
Essex, UK | +44 7394 210 841 | gabrielayobami60@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

AI Product Manager with 4+ years in product, building Generative AI B2C and SaaS products at early-stage startups. Owns the roadmap at Kirro, an AI job search platform with 5,000+ users: launched human-first before automating, lifted feature adoption 25% and retention 40%, and ships improvements directly with Claude Code.

CORE SKILLS

AI & LLM: Generative AI Products, AI Agents, LLM Feature Scoping, Prompt Design, LLM Evaluation, Human-in-the-Loop Design

Product & Data: Roadmap & Prioritisation, Discovery & User Research, A/B Testing, Product Analytics & SQL, OKRs & KPIs, Go-to-Market, Agile / Scrum

PROFESSIONAL EXPERIENCE

Product Manager

Apr 2023 – Present

Kirro (AI Job Search Platform, 5,000+ users in 5+ countries) — Remote

- Own the roadmap and 15+ feature backlog for an AI job platform delivering a ~16% interview rate vs a 2–3% industry average, with 200+ applications sent per user each month, saving 19.8 hours.
- Launched with a human-in-the-loop service (specialists applied for users) instead of automating from day one; grew 50 → 150 users in 3 months and used the learnings to decide what to automate.
- Found a key onboarding drop-off via Mixpanel funnels and user feedback; rebuilt the first run around one AI job-match moment and A/B tested it, lifting feature adoption 25%.
- Scope LLM features, design prompts and define evaluation criteria so AI output quality is measured before and after release.
- Build and ship fixes directly with Claude Code instead of waiting on sprints, contributing to a 40% increase in customer retention.

Product Manager (Contract)

Jan 2025 – Nov 2025

Ambassadors Word (church app: 3,000+ downloads, 1,800+ active users) — Remote, alongside Kirro

- Co-led a mobile app (sign-up, events, donations, AI support assistant), deciding with leadership that pastoral requests always go to a person, not the AI.
- Prioritised the backlog against a fixed deadline, shipping core flows first so the app launched on schedule.
- Wrote PRDs, user flows and specs, and ran user testing before release with engineering and operations across time zones.

Product Operations & Customer Insights Analyst

May 2022 – Mar 2023

CreoVantage — Remote

- Turned user behaviour data and customer feedback into product improvement recommendations adopted by the core product team.
- Bridged customer-facing teams and product squads to shape feature priorities and positioning.

EDUCATION & CERTIFICATIONS

BSc Economics — Ekiti State University, 2021

Certifications — Foundation AI Product Manager (KairosLabs) · Scrum Product Owner (International Scrum Institute, 2026) · Google Business Intelligence
