

GABRIEL ADEWUNMI

AI Product Manager | Growth, B2C & SaaS Products

Essex, UK | +44 7394 210 841 | gabrielayobami60@gmail.com | [linkedin.com/in/gabriel-adewunmi-00796023a](https://www.linkedin.com/in/gabriel-adewunmi-00796023a)

PROFESSIONAL SUMMARY

AI Product Manager with 3+ years building and shipping AI-enabled B2C and SaaS products at early-stage startups. I build products where the AI agent is the product, not a feature bolted on at the end, and I build with AI as well as for it: at Kirro, a 5,000+ user AI job search platform, I own the roadmap, drive decisions from behavioural data (Mixpanel, SQL, Metabase), and use Claude Code to ship fixes and improvements to the product directly, work that increased customer retention by 40% alongside a 25% lift in feature adoption from an A/B-tested onboarding redesign. I bring a business analysis background that keeps every AI feature tied to a measurable outcome.

CORE SKILLS

AI Product Management | AI-Assisted Building & Shipping | Claude Code | Codex | LLM Feature Scoping | AI Evaluation & Feedback Loops | Product Roadmap Ownership | Backlog Management & Prioritisation | Problem Scoping & Success Metrics | Experimentation & A/B Testing | Product Discovery & User Research | PRDs & User Stories | Agile / Scrum Delivery | Product Analytics & SQL | Cross-Functional Collaboration | Stakeholder Management | Operating with Ambiguity

PROFESSIONAL EXPERIENCE

Product Manager

Apr 2023 – Present

Kirro (AI Job Search Platform, 5,000+ users) — Remote

- Use Claude Code to build and ship fixes and improvements to the product myself, improving users' day-to-day experience and contributing to a 40% increase in customer retention.
- Own a 15+ feature backlog across multiple user journeys, driving discovery and delivery from ideation to launch, including AI matching and recommendation features.
- Identified a key onboarding drop-off through Mixpanel funnel analysis and user feedback, reframed the first-run flow around a single AI job-match moment and ran A/B tests that lifted feature adoption by 25%.
- Lead Agile ceremonies for cross-functional engineering and design teams and partner with leadership to align the roadmap with user needs, technical constraints and revenue goals, with success metrics defined so every AI release is judged on adoption and retention.

Product Manager (Contract)

Jan 2025 – Nov 2025

Ambassadors Word — Remote

- Co-led end-to-end development of a mobile application covering authentication, events, donations and AI-assisted support functionality, scoping what the AI assistant should handle and where it should hand off to people.
- Authored PRDs, user flows and feature specs that cut engineering handoff ambiguity and reduced revision cycles.
- Ran product testing and user-feedback sessions to validate assumptions before release, ensuring solutions addressed real pain points.
- Aligned product, engineering and operations stakeholders around shared delivery goals across time zones.
- Prioritised the launch backlog against a fixed contract timeline, sequencing core flows (authentication, events, donations) ahead of enhancements so the app shipped on schedule.

Product Operations & Customer Insights Analyst

May 2022 – Mar 2023

CreoVantage — Remote

- Analysed user behaviour and market trends to surface insights that shaped product positioning and feature prioritisation.
- Translated qualitative customer feedback into structured product improvement recommendations adopted by the core product team.
- Bridged customer-facing teams and product squads to support feature development and optimisation cycles.

FOUNDER PROJECTS

Founder & Product Lead, Wandr (AI Travel Decision Engine)

2025 – Present, in development

Mobile app, Expo / Node.js. Positioned as a travel decision engine, not an itinerary generator.

- Defined the full product strategy, PRD (now v4.0), technical architecture and UI mockups, building with Claude and cross-validating decisions against ChatGPT as a pressure-testing mechanism.
- Designed three AI pillars (Travel DNA, Inspiration Inbox, Ask Why / Trip Confidence), set an affiliate-first, subscription-second model and scoped live data integrations (Amadeus, Skyscanner, Booking.com) as the critical build priority.

EDUCATION & CERTIFICATIONS

BSc Economics — Ekiti State University, Nigeria, 2021

Foundation AI Product Manager Certification, KairosLabs | **Scrum Product Owner Accredited Certification**, International Scrum Institute, 2026 | **Google Business Intelligence Certificate**, Google

TOOLS & TECHNOLOGY

AI Tools: Claude Code, Codex, Claude, ChatGPT, Perplexity, Google AI Studio, Lovable, v0

Data & Analytics: Mixpanel, Metabase, SQL, Google Analytics

Product & Delivery: Jira, Notion, Trello, Asana, Miro, FigJam, Figma
